ICAPCenter@asu.edu

Join us for an engaging Faculty Development workshop where we delve into the ICAP theory, developed by Regents Professor Michelene (Micki) at Arizona State University. ICAP provides operational principles to promote student engagement in active learning classrooms. With a solid grasp of ICAP, you will know how to modify your instruction to improve and design your own active learning activities that foster students' cognitive engagement and enhance learning.

This free workshop takes an interactive approach, blending lectures with hands-on activities that bring theory into practice.
